Detailed Action

- (1) Cancellation of all non-elected claims is requested in order to enhance prosecution.
- (2) The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- (3) The art rejection has been withdrawn.
- (4) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11, 14-30, 32-37 and 48-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(i) The phrase “of sufficient magnitude” is vague and indefinite because it is relative. Furthermore, the specification does not define the phrase nor would it be apparent to one of ordinary skill in the art. As a result, the metes and bounds of the patent protection desired would be unascertainable. Similarly, the phrases “relatively higher velocity”; “substantially different”; “substantially all”; “sufficient magnitude”; and “predetermined” are indefinite.

(ii) The phrase “another location” is indefinite in the context recited because one of ordinary skill would be unable to gauge the “location” in light of the specification. Specify the location. Similarly, “over a period of time” and “said period of time” are vague and indefinite.

(iii) Claim 68 is confusing.

Art Unit: 1619

In view of the above statements, it is the Examiner's position that the claims do not meet the threshold requirement of clarity and are not in compliance for definiteness of 35 U.S.C. 112, second paragraph. Note that definiteness of the claims is important to allow others who wish to enter the marketplace to ascertain the boundaries of protection that are provided by the claims (*Ex parte Kristensen 10 USPQ2d 1701, 1703*).

(5) Please provide the basis for the amendments to claims 1 and 48 in the original specification (as filed).
